

Wrap-Safe™

Prevents cord, cable chaos

Wrap-Safe is the solution to the unruly high pressure hose and power cord anarchy found in most hospitals, clinics and extended care areas. Attached by a snap-rivet, Wrap-Safe is designed to stay on the cord, cable or high pressure hose permanently. The cord, cable or hose is wrapped with the loop side and stuck to the hook side to assure a securely fastened, tangle-free cable, cord or hose ready for transport or storage.

SAFE

Cord security to prevent tangles
Latex free
Easily cleaned with bactericidal cleaner

COST EFFECTIVE

Reduces cost of replacement cables and cords
Prevents accidental cable and cord breakage

CONVENIENT

Easy to use, no tools required
Easy and quick application
Secures with hook and loop cable

VERSATILE

Accommodates most power cords, cables and hoses
Designed for use in critical care and special procedure units, emergency departments and transport situations
